PABLO KOLL

FULL STACK DEVELOPER

PERSONAL PROFILE

I am a Full Stack Developer with experience in Front-End and Back-end application development. During the pandemic I was encouraged to enter the IT world and I am excited about the fact that I can work on something I am passionate about. I am looking for new challenges where I can contribute with my experience and knowledge. I am looking for a position that allows me to continue learning and developing as a professional.

PROJECTS

FULL STACK DEVELOPMENT

Project COCO mall | Oct 2021 - Nov 2021

- Creation of an APP, working in a group using the Scrum methodology and manipulating the versions of the APP through Git. COCO mall is a marketplace where users can shop in different stores with the possibility of entrepreneurship on the platform. The front-end was developed using React and Redux, and styled with Tailwind. The back-end was developed using Node, Express, Sequelize and a relational database with PostgreSQL.

Project BFF Gallery | Sep 2021 - Oct 2021

- Development of an individual dog gallery, using React for the Front End and Redux as state management. The APP consumes data from an API (thedogapi) through a Back End developed in Node JS using Express, adding new features to the original API. The APP has a search option, sorting and filters, as well as a controlled form for the creation of new entities.
